

Volume 17

# **Nondestructive Evaluation and Quality Control**

## **1. Inspection Equipment and Techniques**

Visual Inspection

Laser Inspection

Coordinate Measuring Machines

Machine Vision and Robotic Inspection Systems

## **2. Methods of Nondestructive Evaluation**

Guide to Nondestructive Evaluation Techniques

Replication Microscopy Techniques for NDE

Leak Testing

Liquid Penetrant Inspection

Magnetic Particle Inspection

Magnetic Field Testing

Electric Current Perturbation NDE

Magnabsorption NDE

Electromagnetic Techniques for Residual Stress Measurements

Eddy Current Inspection

Remote-Field Eddy Current Inspection

Microwave Inspection

Ultrasonic Inspection

Acoustic Emission Inspection

Radiographic Inspection

Industrial Computed Tomography

Neutron Radiography

Thermal Inspection

Optical Holography

Speckle Metrology

Acoustical Holography

Strain Measurement for Stress Analysis

Digital Image Enhancement

Acoustic Microscopy

Use of Color for NDE

### **3. Nondestructive Inspection of Specific Products**

Nondestructive Inspection of Forgings

Nondestructive Inspection of Castings

Nondestructive Inspection of Powder Metallurgy Parts

Nondestructive Inspection of Steel Bar, Wire, and Billets

Nondestructive Inspection of Tubular Products

Nondestructive Inspection of Weldments, Brazed Assemblies, and Soldered Joints

Nondestructive Inspection of Adhesive-Bonded Joints

Nondestructive Inspection of Boilers and Pressure Vessels

### **4. Quantitative Nondestructive Evaluation**

Introduction to Quantitative Nondestructive Evaluation

Fracture Control Philosophy

Applications of NDE Reliability to Systems

NDE Reliability Data Analysis

Models for Predicting NDE Reliability

### **5. Statistical Methods**

Statistical Quality Design and Control
